

Vizient Savings Actualyzer— Purchased Services module

Expand your view of purchased services spending

Value

As a supply chain professional you want to demonstrate the value that an efficient supply chain can bring to your health care organization. Through its most recent module—purchased services—Vizient Savings Actualyzer gives you visibility and unprecedented insights into purchased services spend. The module helps heighten supply chain efficiency and value by enabling you to:

- View purchased services spend by category
- Obtain data and insights to identify potential standardization opportunities
- Use the data to identify, track and measure savings
- Tie purchased services spend to existing contract pricing terms

Detailed data to identify new cost-saving opportunities

Considering purchased services represents 20 percent of an organization’s spend on average—that’s a significant amount of spend you want to target for standardization and cost-saving opportunities.

Now you can expand your view of supply costs while also looking deep into categories. Using the Vizient Savings Actualyzer™ purchased services module you get a comprehensive view of spend down to the line-item level.

Achieve focus and clarity by examining your purchased services spend by category, and use the data to identify and act on savings opportunities—all within the Savings Actualyzer platform. This comprehensive view ensures output is normalized so that you’re always seeing an apples-to-apples comparison.

Average operating expenses

About Vizient Savings Actualyzer

Savings Actualyzer is a game-changing solution that drives unique value by integrating different opportunity types into a single view and providing a flexible framework to track your initiatives. Savings Actualyzer does all this while continuously connected to a single data source.

Savings Actualyzer offers a confluence of supply chain and precise analytics to help drive down the cost of care. If there's a better price out there in the supply cost universe, Savings Actualyzer will help spot it and, more importantly, help you understand what might be driving its value. Savings Actualyzer combines your own data with real-time market data to evaluate and illuminate the path to greater opportunities and smarter decisions for your organization.

Our solution moves beyond opportunity identification to guide you through the process of prioritizing, tracking and measuring the opportunity through completion. By monitoring your initiative after it is implemented, you can ensure that the price you negotiated is the price that you continue to pay.

The purchased services module offers new opportunities to reduce costs

- Unravel an often difficult category of supply spend
- Gain a unified and consolidated view of purchased services spend across the health system
- Categorize and track a broad spectrum of spend with easy module functions
- Use the established tools all within the flexible framework of Savings Actualyzer

Discover specialized features of the module

Smart categorization—complex purchased services data set classified by intelligent software on a timely basis

Insight into spend—quickly and easily understand purchased services spend across categories, facilities and cost centers, down to the line-item level

Uncover savings—compare purchased services spend to other health systems 'like you' and understand where you can save

Access to contracts—get access to our knowledgeable advisory and consulting services to maximize the best contracts and savings

Rely on our expertise
