

Vizient Member Insights Snapshot

How Vizient members are approaching COVID-19 vaccinations for staff

Methodology: Vizient® members were surveyed between Dec. 7-21, 2020. Vizient Community groups, list servers and newsletters were used to promote survey participation.

Vaccine rollout

100%
of organizations **will not** make vaccines mandatory for employees (N=72)*

- 58%** Finalized their vaccine distribution plan at the time of the survey (N=23)*
- 73%** Included employed and non-employed medical staff in vaccine distribution plans
- 0%** Developed criteria around staff refusing vaccine

Top three concerns vaccinating all employees

- 72%** Overcoming staff hesitancy or reluctance
- 55%** Vaccine allocation not enough to meet needs
- 43%** Not having full FDA approval (only EUA) for vaccine

Vaccination policy development

Top departments involved

Employed medical staff

Pharmacy staff

Nursing staff

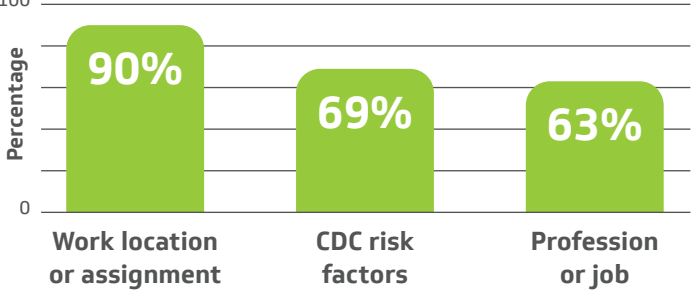

Infection control and prevention staff

Prioritization

98% planned to prioritize certain staff receiving the vaccine*

Top three prioritization factors

*Multiple responses from individuals within the same organization were summarized to include one response per organization.
 CDC = Centers for Disease Control, EUA = emergency use authorization,
 FDA = Food and Drug Administration
