Coronavirus (COVID-19) Pandemic
Whole-of-America Response

Thursday, April 9, 2020

"WHAT THE CDC HAS DONE IS THAT WE'VE REALLY LOOKED AT THE ESSENTIAL WORK FORCE, AND HOW TO MAINTAIN THAT WORK FORCE, PARTICULARLY AT THIS TIME AS WE BEGIN TO GET READY TO RE-OPEN, AND HAVE CONFIDENCE IN BRINGING OUR WORK FORCES BACK TO WORK."  - CDC DIRECTOR DR. ROBERT REDFIELD.

Topline Briefing Points and Messages

▪ FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.

▪ FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
  □ As of April 8, 21 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
  □ Three flights are scheduled to arrive today, 1 in Chicago, 1 in New York City, and 1 in Dallas/Ft. Worth.
  □ An additional 49 flights are scheduled over the next three weeks.
  □ Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
  □ FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
  □ Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors’ normal supply chain to their customers in other areas nationwide.
  □ HHS and FEMA determine hotspot areas based on CDC data.

▪ Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
  □ Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on:
    ▪ Total medical/ hospital beds;
    ▪ Total acute care (ICU) beds;
    ▪ Normal occupancy;
    ▪ Predicted surge occupancy; and
    ▪ Number of ventilators available in your state.
States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.

The federal government has 8,324 total ventilators available: 7,724 in the Strategic National Stockpile; 600 from the Department of Defense.

**On April 8,** the Department of Health and Human Services announced the first contract for ventilator production rated under the Defense Production Act, to General Motors.

GM’s contract, at a total contract price of $489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.

On April 3, President Trump issued “[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](https://www.whitehouse.gov/presidential-actions/memorandum-allocating-certain-scarce-or-threatened-health-and-medical-resources-to-domestic-use/)” directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.

**On April 8,** CDC issued additional guidance to help ensure critical infrastructure workers can perform their jobs safely after potential exposure to the virus.

- The guidance covers essential health care workers who’ve been exposed to the coronavirus.
- Essential workers can, under certain circumstances, go back to work, if they’re asymptomatic and take the recommended actions of taking their temperature before they go to work, wearing a face mask at all times, and practicing social distancing when they’re at work.

**By the Numbers**

- Forty-two states, four territories and 24 tribes have issued stay-at-home orders.
- 52 states and territories have been approved for major disaster declarations to assist with additional needs identified.

- As of **April 8,** FEMA and HHS have provided or are currently shipping 9,240 ventilators from the Strategic National Stockpile (SNS) and the Defense Department to: Alaska (60), California (170), Colorado (100), Connecticut (50), Delaware (50), Florida (200), Georgia (150), Guam (30), Illinois (600), Louisiana (350), Maryland (220), Massachusetts (100), Michigan (700), the Navajo Nation (50), New Jersey (1,350), New York (4,400), Oregon (140), Washington (500) and the Federal Bureau of Prisons (20).

  - Governor Brown of Oregon sent the state’s 140 ventilators directly to New York; and,
DAILY BRIEFING POINTS: COVID-19 WHOLE-OF-AMERICA RESPONSE

- Governor Inslee of Washington is returning 400 of the state’s 500 ventilators to the SNS to be deployed to areas of greatest need.
- Governor Newsom of California is sending 500 state-owned ventilators to medical hotspots across the country through Emergency Management Assistance Compacts (EMAC).
- Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; and a 50-bed Federal Medical Station for D.C.

- Department of Defense deployed 70 ventilators with USNS Mercy, 52 ventilators with USNS Comfort, and 36 ventilators with three Army field hospital personnel supporting Seattle and New York City.
- FEMA obligated $4.7 billion in support of COVID-19 efforts. This week, major obligations include:
  - $55 million for Washington, D.C. for USACE to provide assessment and construction of alternate care facilities to support medical surge.
  - $50 million for Colorado to provide construction of alternate care facilities.
  - $33.7 million for Nevada for DOD to provide Title 32 personnel and equipment to assist states to execute emergency protective measures.
  - $26.1 million for New Jersey for the purchase of PPE and materials at the emergency operations center, and equipment purchases.

- To date, the President has approved 38 National Guard requests for federal support for the use of National Guard personnel in a Title 32 duty status.
  - Eleven requests are pending approval.
  - Pursuant to this approval, the Federal Government will fund 100 percent of the cost share for National Guard orders up to 31 days. These orders of duty must be effective no later than 2 weeks from the date of the Presidential Memorandum on April 6.
  - This approach will allow National Guard members to receive the additional benefits associated with 31-day deployments as well as allow each state additional time to issue new orders.
  - Nearly than 23,000 National Guard troops have activated to help with testing and other response efforts.

- To date, CDC, state, and local public health labs and other laboratories have tested more than 1.95 million samples.
- The U.S. Public Health Service deployed more than 1,500 officers in support of nation-wide efforts to mitigate the virus’ potential spread.
- FEMA currently has 2,800 employees supporting COVID-19 pandemic response out of a total 20,550 agency employees ready to respond to other emergencies should they occur.
- As of April 8, 68 agencies across 24 states, the District of Columbia, one tribe and one U.S. territory have sent: 144 text messages via the Wireless Emergency Alert system; 38 messages to broadcast stations via the Emergency Alert System.
The U.S. Army Corps of Engineers received 40 mission assignments totaling approximately $1.7 billion to design and build alternate care sites in Alaska, American Samoa, Arizona, California, Colorado, Commonwealth of the Northern Mariana Islands, Florida, Guam, Hawaii, Idaho, Illinois, Iowa, Kentucky, Maine, Maryland, Michigan, Missouri, Montana, the Navajo Nation, Nevada, New Jersey, New Mexico, New York, North Dakota, Oregon, Pennsylvania, Utah, Virginia, Washington and Wisconsin.

- As of April 8, more than 2,078 USACE personnel are activated to support the COVID-19 mission, with more than 15,000 personnel engaged in additional response efforts.

- As of April 8, FEMA and HHS have coordinated the delivery of or are currently shipping: 48.6 million N95 respirators, 57.6 million surgical masks, 5.5 million face shields, 9 million surgical gowns, 105 million gloves, 212,000 coveralls, 9,090 ventilators and 8,500 federal medical station beds.

FEMA and HHS Response

FEMA

- On March 13, President Trump declared a nationwide emergency pursuant to Stafford Act
  - 50 states, the District of Columbia, five territories, and 26 tribes are working directly with FEMA
  - A tribal government may choose to be a subrecipient under a state that has chosen to be a recipient of FEMA assistance, or choose to be a direct recipient of FEMA.
  - FEMA activated all 10 Regional Response Coordination Centers to support ongoing response efforts across the country. Emergency operations centers in all states and territories are activated.

- Requests for assistance, especially for critical supplies, should be routed through the proper channels as soon as possible. The most efficient way to identify critical gaps and get results:
  - Consistent with the principle of locally executed, state managed, and federally supported response, requests for assistance at the local and county levels should first be routed to their respective state.
  - Any needs that cannot be met by the state or tribe should then be sent to the respective FEMA regional office. FEMA regions will direct requests to FEMA NRCC in Washington, D.C. for fulfillment.

- FEMA/HHS are delivering supplies and ventilators using its logistics supply chain management system to procure and track commodities to supplement state and tribal purchases.
  - FEMA established an air bridge to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
  - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days. FEMA does not have detailed visibility on PPE amounts until the cargo is loaded.
  - FEMA issued a request for quotation on March 26, for vendors who have medical equipment and supplies to sell to the agency. The RFQ can be found on www.sam.gov.
  - On March 21, HHS awarded contracts to five companies to purchase approximately 600 million N95 respirators over the next 18 months.
DAILY BRIEFING POINTS: COVID-19 WHOLE-OF-AMERICA RESPONSE

▪ The FEMA/HHS Supply Chain Stabilization Task Force increases supply of medical supplies and equipment to front line healthcare workers.
  □ Supply is executed through a four-pronged approach: Preservation, Acceleration, Expansion, and Allocation, to rapidly increase supply today and expand domestic production of medical supplies and equipment to increase supply long-term.
  □ As of April 5, the FEMA/HHS Supply Chain Stabilization Task Force is validating responses from 11 manufacturers to identify viable supply sources for additional PPE.

U.S. Department of Health and Human Services Agencies and Offices

▪ HHS is releasing $160 million dollars in additional CDC funding to dozens of regional hotspots for effective response to the worsening situation in their jurisdictions.

▪ On March 24, HHS announced $250 million in grants from the Administration for Community Living to help states, territories and tribes provide meals to older adults. Additionally, HHS awarded $100 million to support HHS health resources and services administration-funded health centers across the country to address screening and testing needs, acquire medical supplies and boost telehealth capacity.

▪ HHS identified $80 million dollars specifically for tribes, tribal organizations, and tribal health service providers.

▪ On March 21, HHS awarded contracts to five companies to purchase approximately 600 million N95 respirators over the next 18 months. This purchase encourages manufacturers to increase production of N95 respirators now, with a guarantee that companies will not be left with excess supplies if private sector orders are cancelled.

Centers for Disease Control and Prevention

▪ On March 31, the president extended the nation’s Slow the Spread campaign until April 30.

▪ CDC released personal protective equipment optimization strategies for healthcare providers to optimize resources, deal with limited resources, and make contingency plans or alternative strategies when supplies are limited.

▪ On March 28, the Centers for Medicare and Medicaid Services sent a letter to the nation’s hospitals requesting they report data to HHS, CDC, and the CDC’s National Healthcare Safety Network (NHSN) COVID-19 Patient Impact and Hospital Capacity Module. These daily reports include bed capacity and supplies.

▪ On April 3, CDC launched COVIDView, a weekly report that summarizes and interprets key indicators from a number of existing surveillance systems.

▪ On April 4, CDC issued an updated recommendation that requires cruise line companies to arrange for the private transport of travelers to their homes, without the use of commercial flights or public transportation.

▪ On March 27, CDC issued a Global Level 3 Travel Health Notice, advising travelers to avoid all nonessential international travel. Travelers returning from international destinations should stay home for a period of 14 days after returning to the U.S., monitor their health, and practice social distancing.
  □ On March 17, CDC issued a Level 3 Travel Health Notice for cruise ship travel. CDC recommends that all people defer travel on cruise ships, including river cruises, worldwide.
Food and Drug Administration (FDA)

- FDA approved a Phase-3 clinical trial using a rheumatoid arthritis drug for treatment of severe COVID-19 pneumonia.
- On March 28, FDA issued an Emergency Use Authorization (EUA) to allow hydroxychloroquine sulfate and chloroquine phosphate products donated to the Strategic National Stockpile to be distributed and used for certain hospitalized patients with COVID-19.
- FDA has granted 30 Emergency Use Authorizations of commercially available diagnostic tests, including one antibody test to be used in hospital laboratories.
- The National Institutes of Allergy and Infectious Diseases mobilized a rapid research response to quickly develop effective COVID-19 countermeasures, including diagnostics, vaccines, and treatments.

Other Federal Agencies

- On March 27, President Trump signed the CARES Act into law, allocating $2 trillion.
- As of April 7, the Small Business Administration’s Paycheck Protection Program has processed more than $70 billion in loans for qualifying small businesses.
- On April 7, the U.S. Coast Guard continued to facilitate the disembarkation of 100 passengers and 881 crew members from one cruise ship in Florida.
- On March 28, the Office of Personnel Management announced the COVID-19 Surge Response Program. Under this program, agencies will be able to post rotational opportunities for federal employees to support the COVID-19 response.
- On March 24, the Department of Justice created a national task force to actively look for and act on hoarding and price gouging.
  - The task force is a result of the March 23 Executive Order and HHS determination under the Defense Production Act that certain personal protective equipment (PPE) and medical supplies are scarce.
  - DOJ and HHS partnered to distribute medical supplies confiscated from price gougers to those on the frontline of the COVID-19 response in New York and New Jersey.
- The Department of Homeland Security has extended the REAL ID enforcement deadline to Oct. 1, 2021.
- American Red Cross is continuing to seek blood and convalescent plasma donations
  - People who have fully recovered from COVID-19 have antibodies in their plasma that can attack the virus.
  - The Red Cross has been asked by the U.S. Food and Drug Administration (FDA) to help identify prospective donors and manage the distribution of these products to hospitals treating patients in need. More information at RedCross.org.
- Many telecommunication companies are working with the Federal Communications Commission to “Keep Americans Connected.” This pledge is designed to ensure that Americans do not lose their broadband or telephone connectivity during the COVID-19 response.
DAILY BRIEFING POINTS: COVID-19 WHOLE-OF-AMERICA RESPONSE

▪ The Internal Revenue Service (IRS) donated 58,400 N95 respirators to the states of California, Kentucky, Maryland, Massachusetts, New York, Pennsylvania, Tennessee, Texas and Washington, D.C.

▪ The U.S. Department of Labor announced availability of up to $100 million for Dislocated Worker Grants to help address the workforce-related impacts related to COVID-19.

▪ The U.S. Department of Housing and Urban Development issued a moratorium on foreclosures and evictions for single family homeowners with FHA-insured mortgages for the next 60 days.

▪ The U.S. Department of Agriculture is delivering one million meals per week to children in rural areas who are out of school.

▪ The U.S. Department of Education announced all borrowers with federally held student loans will have zero interest rates for at least 60 days. Additionally, these borrowers will have the option to suspend their payments for at least two months to allow them greater flexibility.
