
Environmentally Preferred Data Analytics

Helping organizations get insight into their environmentally preferred sourcing

Overview

Vizient® advanced analytic capabilities offer members access to the nation's largest, most comprehensive database of environmentally preferred attributes in the nation. Vizient provides innovative approaches to analyzing your organization's spend data to integrate environmentally preferred considerations into purchasing decisions.

The tools in the chart included on page 2 are precursors to more enhanced offerings coming soon.

Environmentally preferred tools

In addition to offering members the largest portfolio of environmentally preferred products, Vizient's Environmentally Preferred Sourcing program offers various analytics to assist members with targets and goals. Environmentally preferred (EP) attributes for all contracted products are made available in Vizient Catalog. Attributes are displayed by hovering over the green EP icon. Users can also perform specific environmentally preferred attributes searches and download their results.

The Environmentally Preferred Purchasing dashboard offers enhanced analytics on environmentally preferred purchasing metrics. This tool highlights organizational spend with one or many environmentally preferred attributes, including how much of your organization's spend meets the gold standard of compliance to 11 chemical and at least 2 waste management attributes. This tool provides users the ability to analyze environmentally preferred percentage and spend by facility, product spend category, and clinical label.

DataLYNX and Virtual Item Master, which will be replacing DataLYNX in 2021, offer specific line item detail with environmentally preferred attribute information in aggregate. These tools will serve as your organization's item master solution with environmentally preferred attribute data at the product level.

An overview of our technologies

The below chart gives you insight into what information is housed in each system.

	EPP Dashboard	DataLYNX	Virtual Item Master
Total member purchases included (all PSCs)	●	●	●
Provide total EP% spend based on total submitted spend	●		●
Calculated gold standard EP% spend within the EP attributed spend	●		
Provide member combined spend data and EP%	●		
Searchable by PSC	●		●
Searchable by clinical label	●		
Total spend by attribute	●		
Line item detail with EP attribute information		●	●
Top attributes by unique product count		●
