

Vizient Failure-to-Supply Program

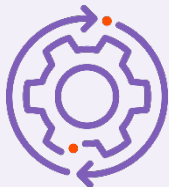

Advancing sustainable performance by centralizing the recovery of member savings

Advance performance

Savings performance

Contract terms and quarterly reporting drives sustainable member savings

Operational performance

Centralized recovery process lessens your organization's administrative burden

Drive sustainable savings

The Vizient® Failure-to-Supply pharmacy program advances sustainable performance by recovering purchases when suppliers cannot fulfill orders for contracted items. Vizient collects the purchases on the participating member's behalf and provides quarterly reporting along with recovered purchases.

Further operational efficiency

The Failure-to-Supply program lessens your organization's administrative burden by centralizing the recovery of purchases, enabling you to focus on what matters most – your patients.

Vizient has a team dedicated to processing failure-to-supply claims with suppliers. Purchases are identified, collected, and reimbursed back to participating members. Recovered purchases are paid quarterly and applied as credits to the member's distributor account. The program provides quarterly reports, outlining all claims processed for the quarter and ensuring accurate accounting.

Harness the power of Vizient

With more than \$170 million in savings recovered for participating pharmacy members since the program's inception, and an average of \$12 million in savings recovered annually, the program delivers value by driving performance to your bottom line.
