

Vizient RxCommit

Committed purchasing for enhanced contract pricing

Overview

Vizient now provides RxCommit, a new sourcing solution for Vizient member health systems and hospitals who are ready to standardize their formulary preference in specific categories.

RxCommit is best suited for members that:

- Have a centralized formulary management process and cultural support for formulary management and conversion efforts
- Are ready for a longitudinal commitment of their pharmaceutical spend for enhanced value
- Are willing to uphold RxCommit contract commitments
- Want additional contract value with the ability to adopt based on their local needs

Supplier benefits

Single point of contact: RxCommit staff work directly with key contacts at the member site(s) to facilitate communication of value and mutual opportunity, streamlining information and feedback to our supplier partners.

Drive market share and compliance: RxCommit members are provided with quarterly contract compliance data at the individual site level. This promotes and ensures system pull-through and compliance for all participating members.

Ensure contract prioritization: RxCommit contract opportunities are highlighted on an ongoing basis to promote member adoption and gain additional market reach.

Access to a diverse group of members: RxCommit membership targets include both acute and non-acute facilities. The program is appropriate for a continuum ranging from small/rural and independently controlled members to large integrated delivery networks and academic medical centers.

Education and outreach: RxCommit acts as an extension of supplier resources for key accounts while extending supplier reach for accounts without dedicated support.

Enhanced Value

In-depth analytics

Compliance monitoring
